ELECTION/RESTRICTION

1. **Claim(s) 1-55** is/are pending in the application.

ELECTION/RESTRICTION

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. **Claims 1-17 and 19-35** drawn to a method of identifying a polynucleic acid encoding at least one polypeptide capable of interacting *in vivo* with a polypeptide of interest, classified in Class 435, subclass 6.

II. **Claims 18, 36-54** drawn to an array comprising at least one set of plasmids, classified in Class 536, subclass 23.1 and 24.3.

IV. **Claim 55** drawn to a method of generating an array of plasmids, classified in Class 435, subclass 6.

3. The inventions are distinct, each from the other for the following reasons.

Inventions I and II are related as a process of use and a product. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the product as claimed can be used simply as a means to store and/or archive important nucleic acid sequences.

Inventions I and III are unrelated and patentably distinct methods with different goals, different intermediate steps and different end results (see MPEP § 806.04, MPEP § 808.01).

Inventions II and III are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially

different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by another and materially different process.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and the necessity for non-coextensive literature and sequence searches, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ethan Whisenant, Ph.D. whose telephone number is (703) 308-6567.
